Problem

- Hard to arrange event with group
- Difficult to keep track of everyone's schedule
- Not designed for project planning

Time Management

Project Orientate

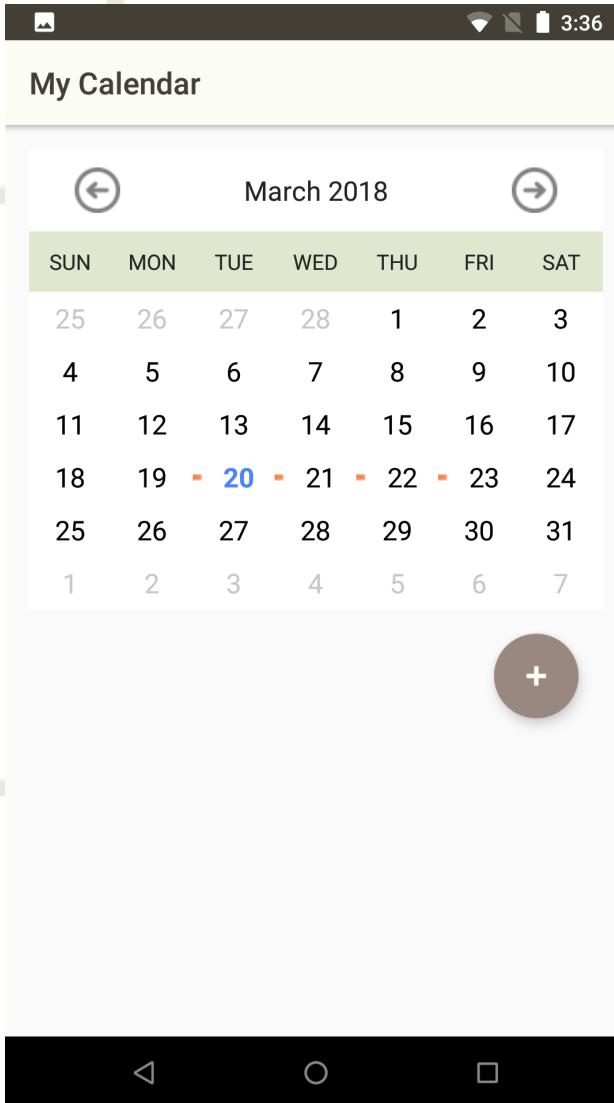

Share Schedule

File Organizer

Future Work

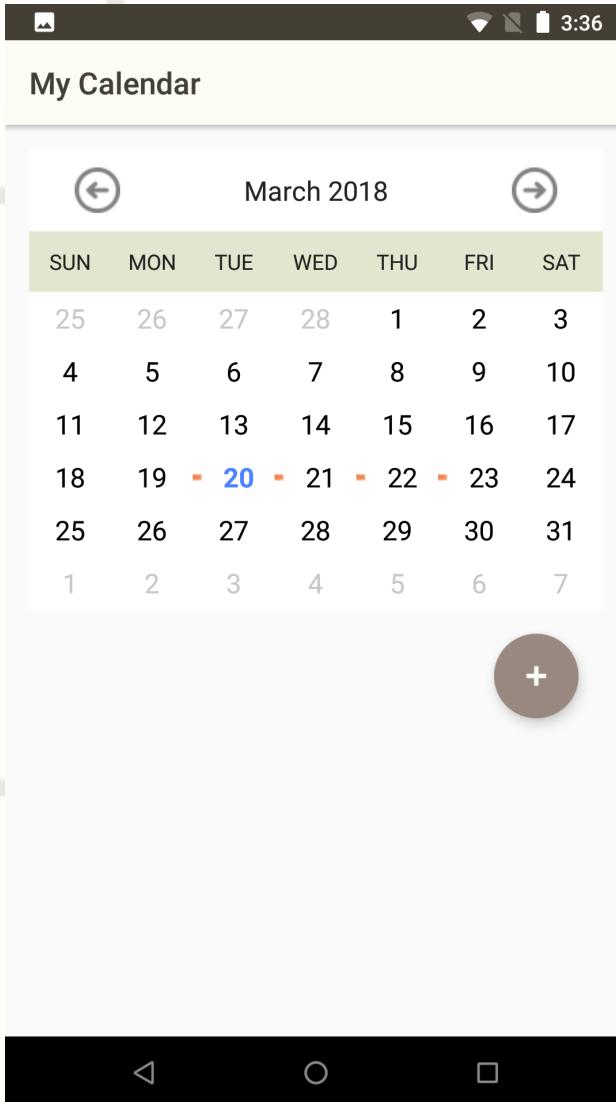

Time Management

- Each user has a private calendar that track his or her schedule easily

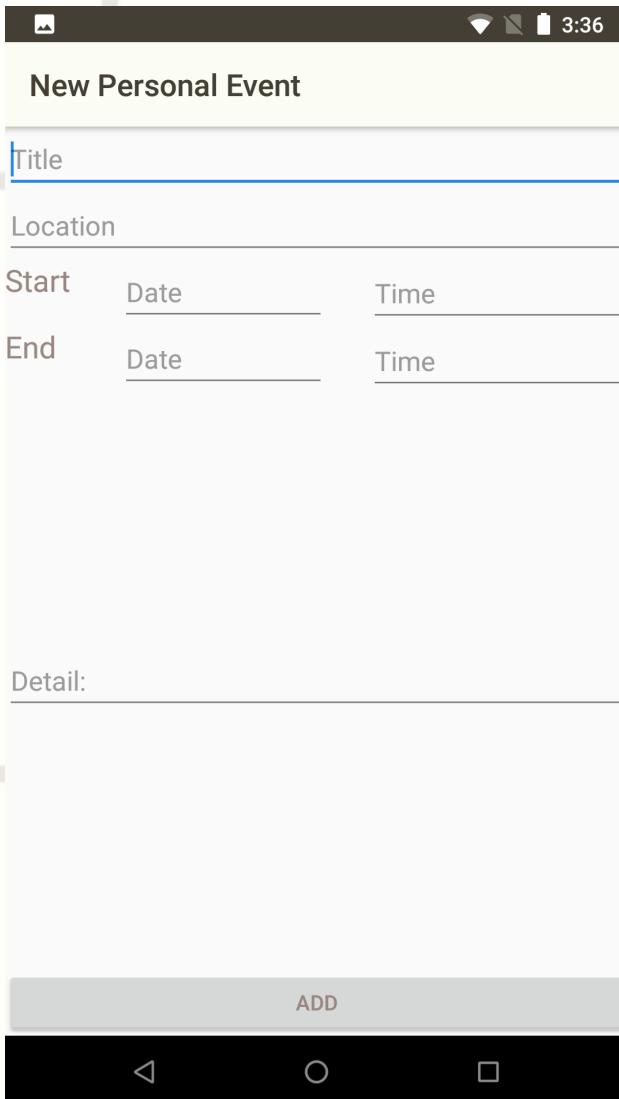

Time Management

- The user can import this personal schedule to the project calendar

13

Time Management

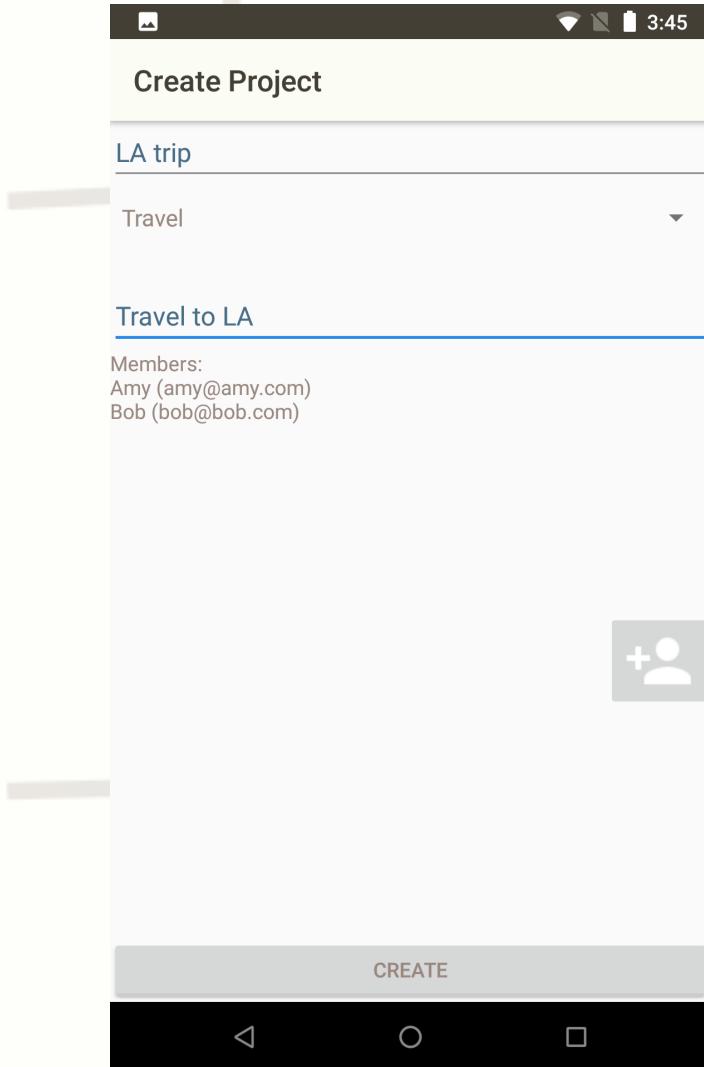

- So the user don't have to manually upload personal event to project calendars

21

28

13

Project Orientate

- User can create a separated group calendar for each project

21

28

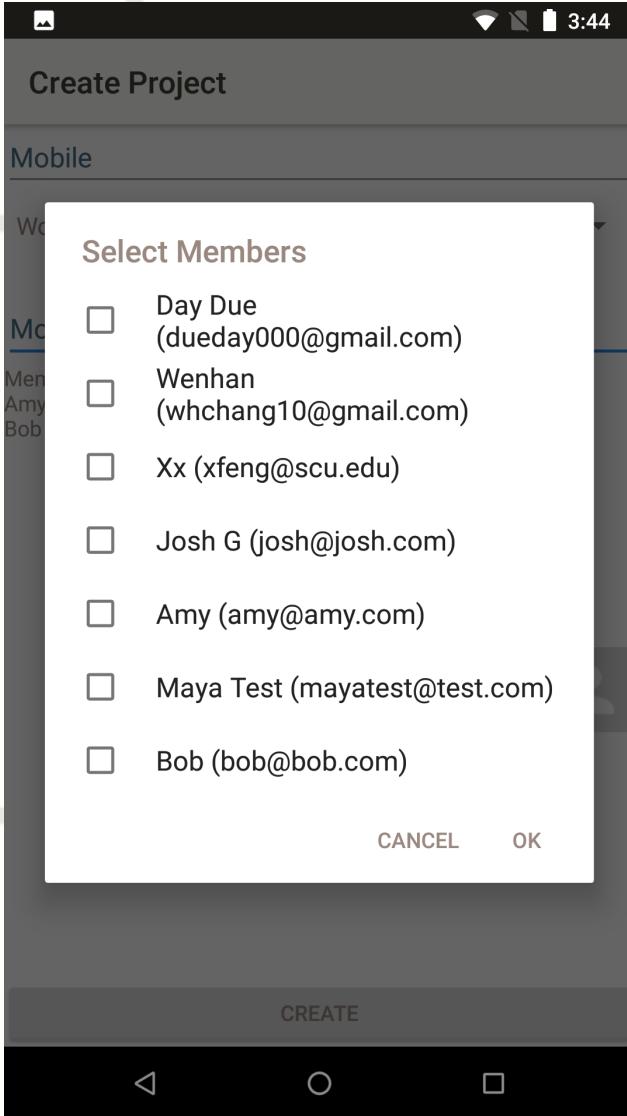

13

Project Orientate

- You can invite people to join your project

21

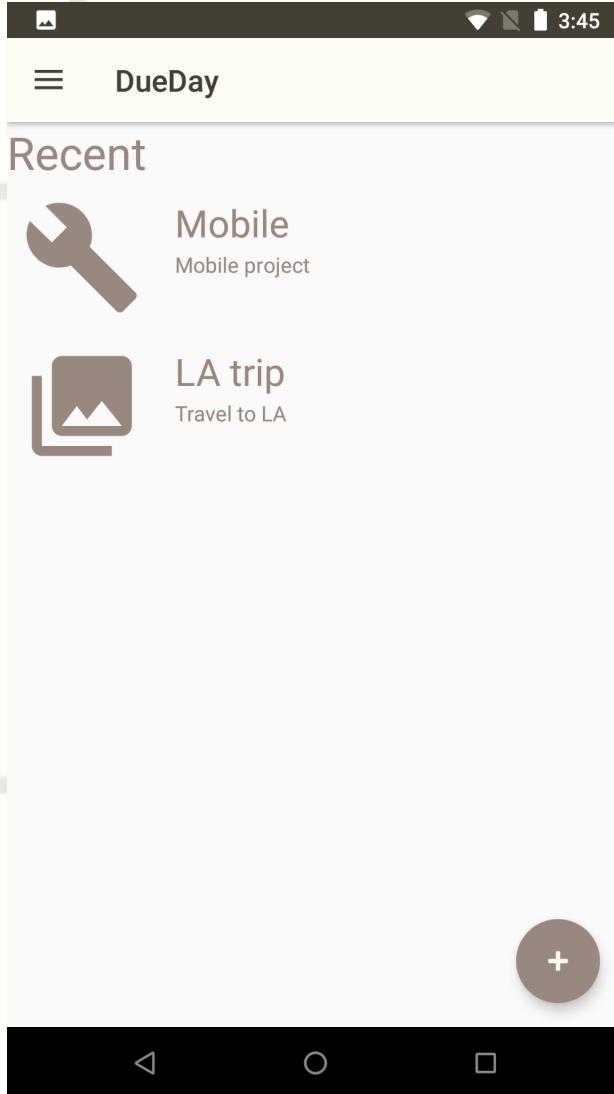

28

13

Project Orientate

- This application helps the user to keep organized between projects

21

28

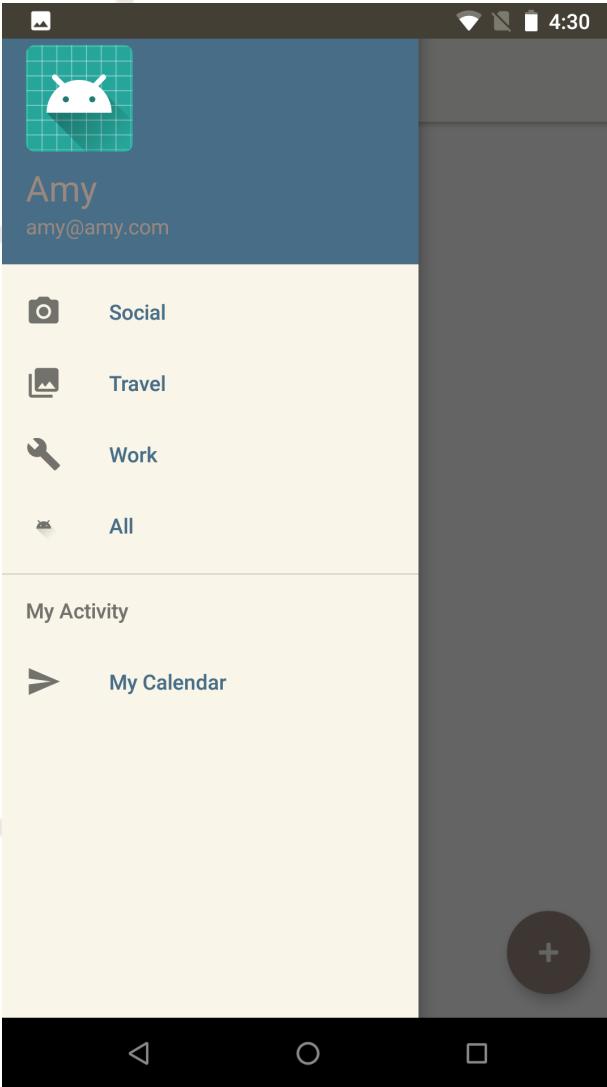

Share Schedule

- In a project, the user can share his or her schedule to others on the group calendar
- The user can also see others' schedule on the group calendar

More

- Not only for project usage
- Based on the user's need, the projects are labeled to different tags:
 - Work
 - Social
 - Travel

File Organizer

- In future work, user can upload photo and document to an event
- Users can share the materials for the project in group
- Keep track of the statuses of the project

13

Tools

- Here are the tools we used to develop application—DueDay :
